

Clea connect

The next-generation smart timer that ends the era of mechanical timers!

Why recommend Clea to your clients?

Effortless installation: directly replace the old mechanical standard timer.

Compact design: save space inside the electrical panel, fits even in tight ones

Ideal for renovation: compatible with old panel, making it perfect for upgrades

Precise and reliable: automatically syncs with the smartphone's time and includes a quartz backup battery to maintain settings during power outages.

Finis les horloges à picots !

Say goodbye to outdated pin timers! Clea installs in one minute thanks to its plug & play system. It snaps directly into the electrical panel, replacing a mechanical timer no modifications needed, just few connections to a 230V power supply are all it takes.

An easy upgrade for your clients

-  **Intuitive control via the CCEI Connect app**
(available on iOS & Android)
-  **Quick setup means time saved**
on every installation
-  **A modern, reliable, and cost-effective alternative**
to traditional mechanical timers
