

LIMPIDO VP

CONNECTED SALT CHLORINATOR WITH A BUILT-IN DISPLAY FOR SIMPLE, RELIABLE, AND AUTOMATED CONTROL

BUILT-IN DISPLAY

Thanks to its integrated display, built directly into the unit, you can view and adjust the essential settings at a glance. Its intuitive interface makes day-to-day pool management simple and effortless.

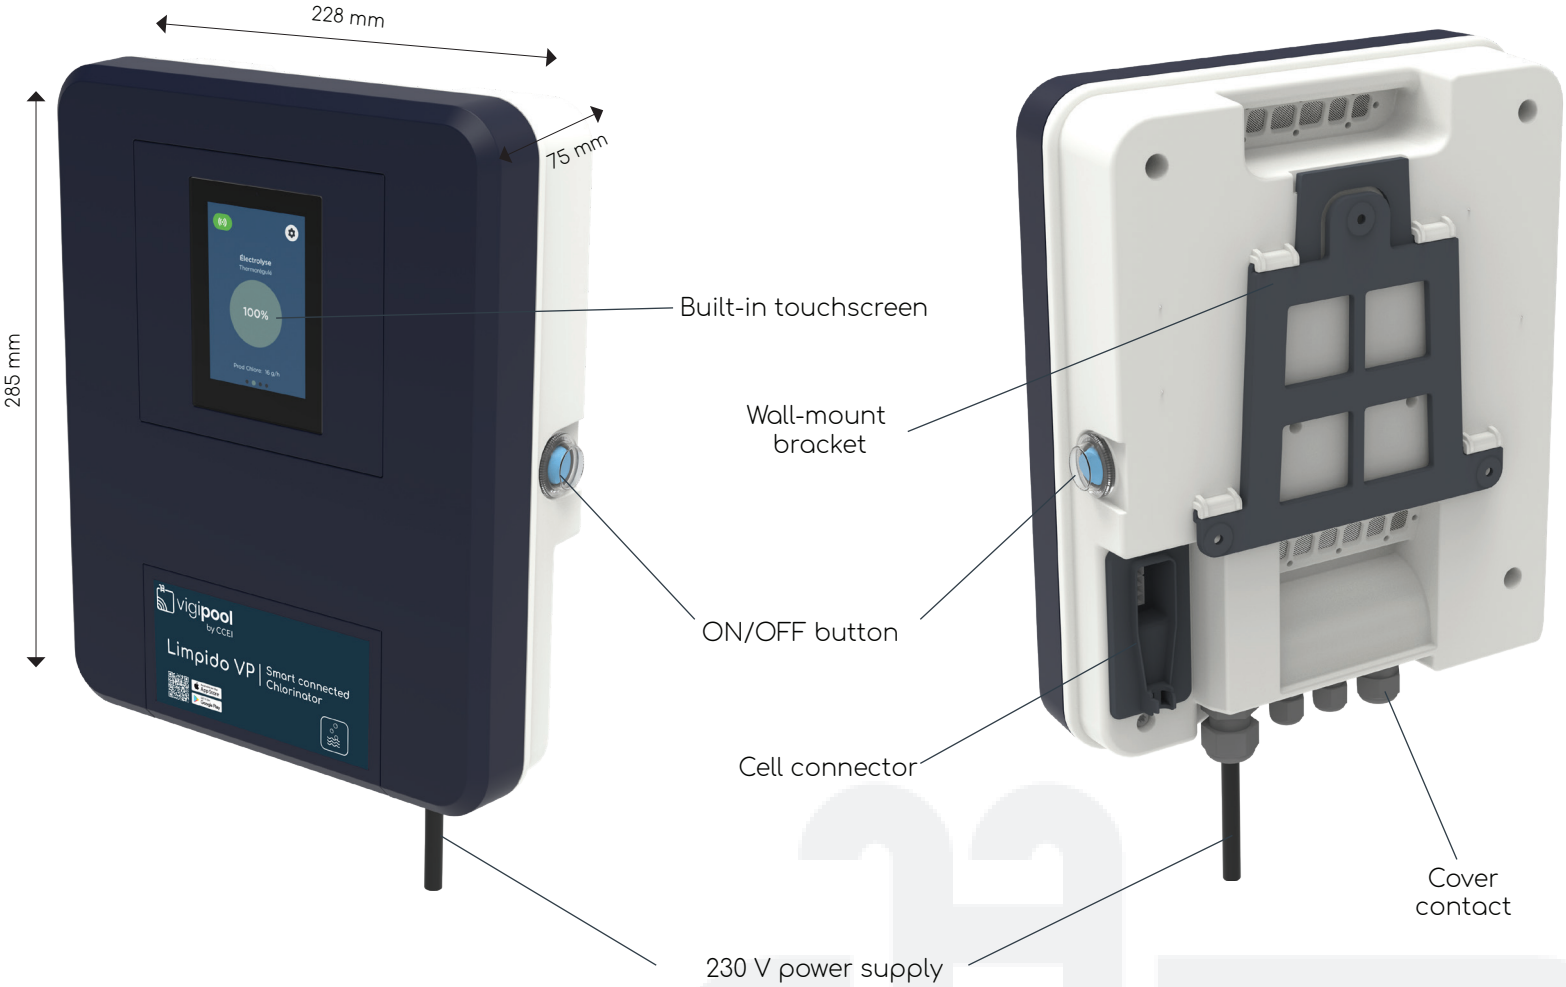

ULTRA-DURABLE CELL

Equipped with the new ultra-durable X-Cell 3, Limpido VP delivers reliable, long-lasting chlorine production. Engineered for exceptional durability, it provides peace of mind season after season.

100% CONNECTED TO VIGIPOOL

Fully compatible with the Vigipool ecosystem, Limpido VP seamlessly connects with other products in the range. Monitor, control your salt chlorinator and your pool remotely from the Vigipool app for maximum convenience.

PRODUCT OVERVIEW

AUTOMATIC CHLORINE PRODUCTION

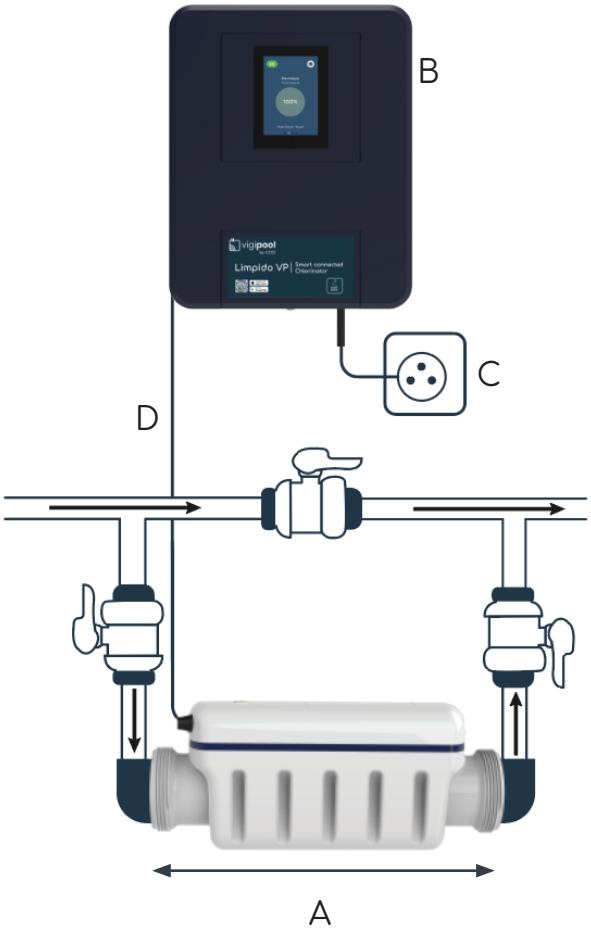

INTEGRATED FLOW SWITCH FOR EASY INSTALLATION

INTEGRATED TOUCHSCREEN FOR INTUITIVE CONTROL

QUICK DEVICE SETUP WITH THE VIGIPOOL APP

INSTALLATION RECOMMENDATIONS

The X-Cell 3 electrolytic cell features an **integrated flow switch and temperature probe ,** allowing installation with a single cut in the pipework.

QUICK INSTALLATION:
The salt chlorinator plugs directly into a standard 230 V mains outlet and does not need to be connected to the filtration power supply. Simply connect the cell to the control unit using the dedicated connector, and your water treatment system is ready to operate.

A: 325 mm cut in the pipework.
Recommended bypass installation.

B: Power supply unit with integrated touchscreen.

C: Connection to a 230 V mains outlet.

D: Power cable between the power supply unit and the cell.

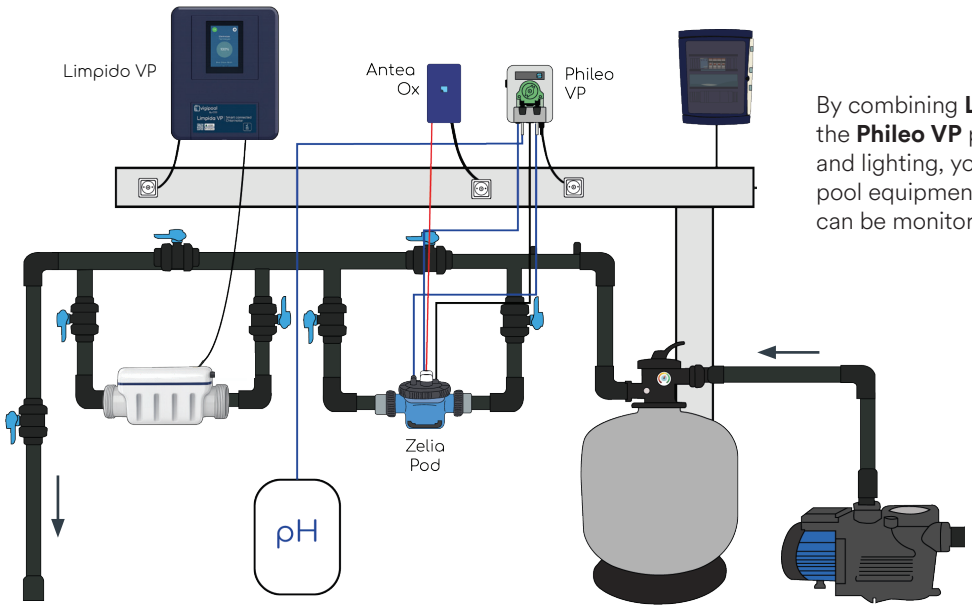

REGULATED PROD. : PRECISE DOSAGE & CELL CONSERVATION

Salt chlorinator naturally disinfects water by producing chlorine from a low salt concentration. Limpido VP provides efficient production up to a maximum of 34 g/h.

To prevent chlorine overdosing and extend the lifespan of the cell, we recommend pairing the chlorinator **with a connected Vigipool RedOx regulation device** (such as Antea OX), which automatically adjusts chlorine production according to the pool's needs.

Antea OX :
VigiPool Orp Measurement

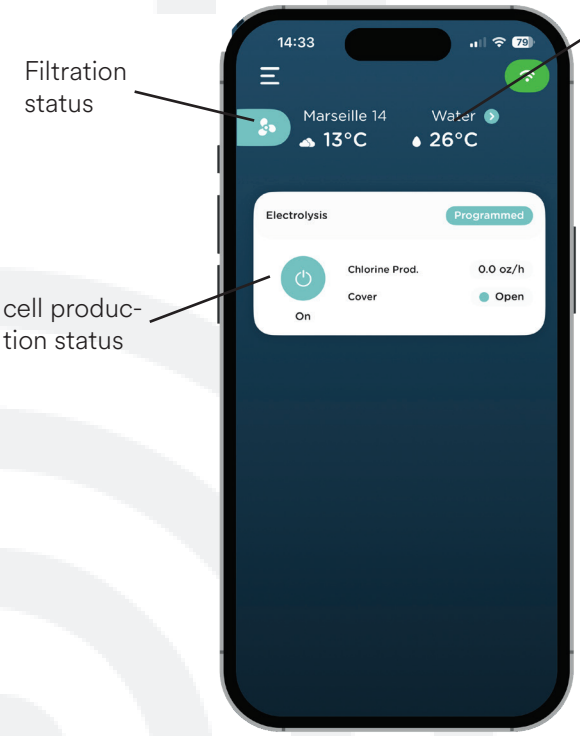

By combining **Limpido VP** with the **Antea OX** chlorine controller, the **Phileo VP** pH controller, and the **Tild VP** module for filtration and lighting, you create a smart, fully connected, and automated pool equipment room. Thanks to built-in Wi-Fi, all your equipment can be monitored and controlled remotely from a single interface.

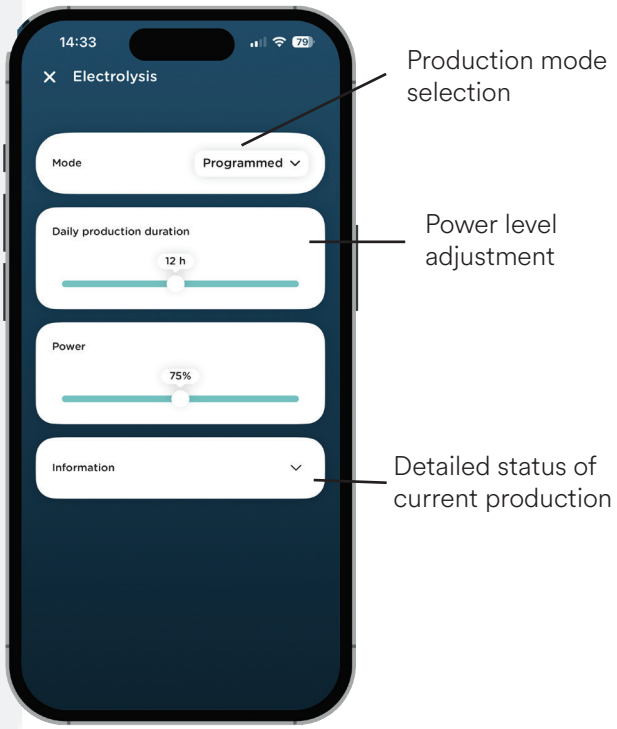

Vigipool is designed to grow with your installation by integrating new features such as variable-speed pump management, filter pressure monitoring, and other connected equipment, delivering an ever more comprehensive automation experience.

LIMPIDO VP IN THE VIGIPOOL APPLICATION

Overview Screen

Detailed View

* Available modes: ON (active production as soon the filtration is on), Thermoregulated (production time adjusted according to water temperature), Regulated (production adjusted according to a setpoint provided by a Vigipool RedOx device), Boost (maximum power production for a specific duration), OFF (production stopped).

WHAT IS VIGIPOOL?

vigipool by CCEI

Vigipool is your smartphone application that allows you to keep your technical room with you at all times. Within the app, centralize the devices in your technical room and control your equipment connected to your home WiFi from anywhere in the world. Vigipool allows you to configure your Limpido VP chlorinator from A to Z: production level, production mode, and water hardness for optimized polarity reversal.

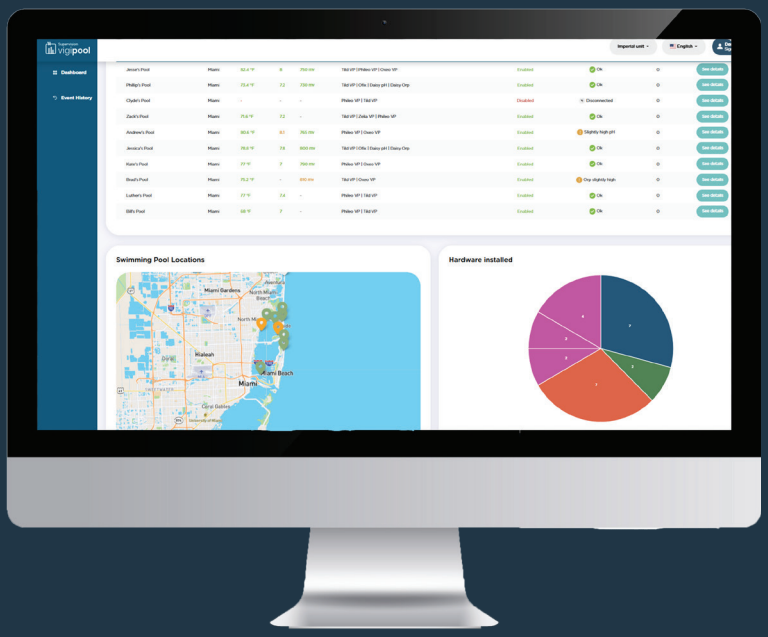

AN EVOLVING SOLUTION:
For an even more complete installation, add Vigipool-compatible devices to your technical room and see new features added to your application (filtration control, LED lighting control, etc.).

VIGIPOOL SUPERVISION

With Vigipool Supervision, pool professionals can monitor and manage their entire pool portfolio in real time.

- Customer pool monitoring
- Intervention scheduling via interactive map
- Instant overview of the portfolio
- Alert reception and management
- Access to pool history
